

Use case	Consult interactive map/summary table
Scope	Participium System – Report consultation
Level	User-goal
Intention in context	Consult the summary table and view open reports
Primary actor	Unregistered citizen (inherited by Registered citizen)
Support actor	-
Stakeholders' interest	Citizen: view list/map of the reports
Precondition	-
Minimum guarantees	-
Success guarantees	The citizen is able to visualize the interactive map or the summary table
Trigger	-
Main success scenario	1. The citizen enters Participium 1. The citizen selects “View Map” or “View summary table” 2. System displays the interactive map or the summary table
Extensions	2.a No reports are available on the platform: the UC ends with failure

Use case	View report
Scope	Participium System – Report consultation
Level	User goal
Intention in context	View open reports about the city of Turin
Primary actor	Unregistered citizen (inherited by Registered citizen)
Support actor	-
Stakeholders' interest	Citizen: Remain updated about the citizen reports
Precondition	-
Minimum guarantees	-
Success guarantees	The citizen can consult open reports
Trigger	-
Main success scenario	1. Citizen chooses the report's category, status and date 2. System shows filtered reports 3. Citizen clicks the report he wants to follow. 4. The system opens the report selected
Extensions	2.a There aren't reports available for the selected category: The UC fails 2.a.1 The UC returns to step1

Use case	Receive report updates
Scope	Participium System – Report update
Level	User goal
Intention in context	Receive updates about the chosen report
Primary actor	Unregistered citizen (inherited by Registered citizen)
Support actor	Message gateway, Email gateway
Stakeholders' interest	Citizen: remain updated about the report status
Precondition	A report has to be selected
Minimum guarantees	-

Success guarantees	The citizen receives updates about the selected report
Trigger	-
Main success scenario	1. Citizen selects a report 2. The system asks the citizen if he want to receive notifications 3. The citizen accepts to receive notifications 4. The system sends updates of the selected report 5. The citizen receives updates
Extensions	3.a The citizen refuses to receive notifications: The UC ends with failure

Use case	Register in the system
Scope	Participium System – Registration Management
Level	User goal
Intention in context	The citizen registers in the system
Primary actor	Registered citizen
Support actor	Email gateway
Stakeholders' interest	-
Precondition	-
Minimum guarantees	-
Success guarantees	The citizen registers successfully
Trigger	-
Main success scenario	1. The citizen opens Participium 2. The system asks the citizen if he wants to register 3. The citizen selects the option to register 4. The system asks the citizen's information 5. The citizen enters his email/password 6. The system sends an email to the citizen to confirm the registration 7. The citizen opens the email and confirms the registration through a link 8. The system shows the confirmation of the registration page
Extensions	3.a The citizen doesn't want to register in the system: the UC ends. 5.a Email/password not valid: the UC returns to step 4. 7.a The citizen doesn't confirm the registration: the UC ends with failure.

Use case	View public statistics
Scope	Participium System – Statistics Management
Level	User goal
Intention in context	The citizen can see the other report's statistics
Primary actor	Organization Office/ Unregistered citizen (inherited by Registered citizen)
Support actor	-
Stakeholders' interest	Citizen: be updated about the status of multiple reports Administrator: consult statistics to follow the progress of multiple reports simultaneously
Precondition	-

Minimum guarantees	-
Success guarantees	The actors involved are able to consult statistics
Trigger	-
Main success scenario	1. The actor opens the Participium portal 2. The system shows the opening page 3. The actor selects to view public statistics 4. The system shows the reports' public statistic
Extensions	

Use case	Fill in a problem form
Scope	Participium System – Report creation
Level	User goal
Intention in context	The citizen is able to fill in a problem form in order to create a report
Primary actor	Registered citizen
Support actor	-
Stakeholders' interest	Registered citizen: signal anomalies in the municipality of Turin Organization Office: be aware of the anomalies of the city so that they can be solved as soon as possible
Precondition	The citizen is registered in the system
Minimum guarantees	-
Success guarantees	The report is successfully submitted
Trigger	-
Main success scenario	1. The citizen opens Participium portal 2. The system shows the opening page 3. The citizen logs in the system 4. The system validates the log in 5. The citizen selects “Submit report” option 6. The system opens an empty problem form 7. The citizen fills in a problem form 8. The system validates the form and asks if the report has to be anonymous 9. The citizen chooses anonymity/not anonymity 10. The system confirms the choice 11. The citizen sends the report 12. The system publishes the report on the portal
Extensions	4.a Credentials aren't valid: the UC returns to step 3 7.a The problem form isn't valid (empty/ without photos): the UC fails 11.a The citizen doesn't send the report: the UC ends with failure

Use case	Reply to message
Scope	Participium System – Communication Management
Level	User goal
Intention in context	The citizen replies to a message
Primary actor	Registered Citizen
Support actor	Message gateway/External chatbot
Stakeholders' interest	Citizen: Reply to a previously received message

	Organization office: send more specific updates about the report the citizen has sent
Precondition	A report has been submitted
Minimum guarantees	-
Success guarantees	Reply to a message
Trigger	A message has been received earlier
Main success scenario	1. Citizen receives a message 2. System notifies the citizen 3. Citizen writes and sends the reply
Extensions	-

Use case	View private statistics
Scope	Participium System - Statistics Management
Level	User goal
Intention in context	The citizen can see the other report's statistics
Primary actor	Organization office staff
Support actor	-
Stakeholders' interest	Organization office: View private statistics in order to be updated about reports
Precondition	-
Minimum guarantees	-
Success guarantees	Organization office will have the ability to see private statistics
Trigger	-
Main success scenario	1. The actor opens Participium portal 2. The system shows the opening page 3. OO selects "view private statistics" 4. System shows private statistics
Extensions	

Use case	Accept/Reject reports
Scope	Participium System – Report Management
Level	User goal
Intention in context	Organization office is able to accept/reject all the submitted reports
Primary actor	Organization office staff
Support actor	-
Stakeholders' interest	Organization office: accept the useful reports and reject the useless ones
Precondition	Reports must be previously submitted by citizens
Minimum guarantees	-
Success guarantees	Useful reports will be
Trigger	-
Main success scenario	1. The OO opens the list of the report 2. The system displays all the report written by the citizens 3. The OO reviews all the report and accept or reject the reports
Extensions	2.a No reports are available: the UC fails

Use case	Assigns report to the Technical Office responsible
Scope	Participium System – Report Management
Level	User Goal
Intention in context	The OO assigns to the Technical Office responsible for handling the problem.
Primary actor	Organization Office staff
Support actor	-
Stakeholders' interest	OO: solve the problem
Precondition	A report must have been previously accepted.
Minimum guarantees	-
Success guarantees	The report will be assigned to a Technical Office.
Trigger	-
Main success scenario	1. The OO selects the list of the accepted reports 2. The system shows the list of accepted reports 3. The OO chooses a report to be assigned to a TO. 4. The system confirms the report assignment and records it.
Extensions	2.a No accepted reports: the UC ends with failure 2.b The OO cancels: the UC ends with failure

Use case	Send message to the citizen
Scope	Participium System – Report Update
Level	User Goal
Intention in context	The OO sends messages to the citizens about the report.
Primary actor	Organization Office
Support actor	External Chatbot/Message Gateway
Stakeholders' interest	OO: Send clarifications about a status update Citizen: Be able to follow the report and communicate with the OO
Precondition	A report must have been sent
Minimum guarantees	The process doesn't stop even if the message is not sent
Success guarantees	The message is delivered correctly
Trigger	-
Main success scenario	1.OO chooses the option to send a message to the citizen 2.The system records the status update 3.OO composes a message and sends it to the citizen 4.The system delivers the message through the system / the external chatbot
Extensions	3.a The OO cancels: the UC fails

Use case	Write an explanation for rejected reports
Scope	Participium System – Report Management
Level	User goal
Intention in context	Organization Office gives an explanation about why a report has been rejected
Primary actor	Organization Office
Support actor	-
Stakeholders' interest	OO: Inform the citizen about why the report has been rejected

	Citizen: be aware of the reason why the report has been rejected
Precondition	A report has been previously rejected
Minimum guarantees	-
Success guarantees	The explanation is delivered to the citizen
Trigger	-
Main success scenario	1.The OO rejects the report 2.The system marks the report as rejected 3.The OO writes an explanation and sends it to the citizen 4.System delivers the explanation
Extensions	-

Use case	Plan intervention
Scope	Participium System – Report Management
Level	User goal
Intention in context	The actor plans the intervention to solve the problem
Primary actor	Technical Office staff/ External Company Personnel
Support actor	-
Stakeholders' interest	-
Precondition	A report must be assigned to the TO responsible
Minimum guarantees	-
Success guarantees	The intervention is planned successfully
Trigger	-
Main success scenario	1. The actor receives an assignment 2. The system records the assignment 3. The actor proceeds to plan the intervention 4. The system sets the report to “Work in progress”
Extensions	-

Use case	Evaluate further "Suspended" reports
Scope	Participium System – Report Management
Level	User goal
Intention in context	The actor proceeds to evaluate eventual problems
Primary actor	Technical Office staff/ External Company Personnel
Support actor	-
Stakeholders' interest	TO/ECP: solve the problem as soon as possible
Precondition	Some technical or organizational issues came up and the report is set to “Suspended”
Minimum guarantees	-
Success guarantees	The “Suspended” reports are reviewed to find a solution
Trigger	-
Main success scenario	1. The actor sets the report to “Suspended” 2. The system updates the status 3. The actor proceeds to evaluate the problems that came up
Extensions	-

Use case	Update status and close report
Scope	Participium System – Report Management
Level	User goal
Intention in context	The TO updates the report status and close it when it’s solved

Primary actor	Technical Office staff
Support actor	-
Stakeholders' interest	TO: mark the report as “Resolved” and close it
Precondition	The report has been worked on
Minimum guarantees	-
Success guarantees	The TO closes the report with success
Trigger	-
Main success scenario	1. The TO selects to update the report status 2. The system shows the latest updates 3. The TO closes the report to “Resolved” and close it
Extensions	-

Use case	Change report status
Scope	Participium System – Report Management
Level	User goal
Intention in context	The actor involved updates the report status as soon as the intervention proceeds
Primary actor	Technical Office staff/ External Company Personnel
Support actor	-
Stakeholders' interest	Citizen: be aware of the report status changes
Precondition	The intervention is proceeding
Minimum guarantees	-
Success guarantees	The report status is changed correctly
Trigger	-
Main success scenario	1. The primary actor opens the report 2. The system shows the latest report status 3. The actor changes the status of the report 4. The system updates the report
Extensions	3.a The actor cancels: The UC ends with failure

Use case	Exchange information/comments
Scope	Participium System – Report Update
Level	User goal
Intention in context	The actor exchange information and comments about the changes of the status of the report
Primary actor	Technical Office staff/ External Company Personnel
Support actor	Report gateway
Stakeholders' interest	TO/ECP: be aware of the other actor ‘s actions
Precondition	-
Minimum guarantees	-
Success guarantees	The communication between the actors is successful
Trigger	-
Main success scenario	1. The primary actor changes the status of the report 2. The system uploads the new status 3. The actor communicates the changes to the other actor
Extensions	-
